Cleaning Systems, Inc. Achieves ISO 9001-2000 Re-Certification

De Pere, WI - **Cleaning Systems, Inc. (CSI)**, a worldwide leader in formulating and manufacturing chemical products for vehicle cleaning and protection, announces it has been recertified to ISO 9001:2000, an internationally recognized standard for quality management systems. The International Organization for Standardization (ISO), headquartered in Geneva, Switzerland, has established the requirements that must be in place for certification. CSI first achieved certification in 2001.

This re-certification confirms CSI's commitment to quality in customer service, design and manufacturing. Certification to the standard is voluntary, and organizations must complete a rigorous auditing process by a third-party registrar. The certification was authorized by TÜV Rheinland®, a premier global provider of independent testing and certification services with 15 locations throughout North America.

"For more than 30 years, CSI has been committed to providing excellence in quality and consistency of performance in servicing the needs of our customers. ISO 9000 provides the tools to grow our business without losing site of what is important," states Dave Krause, President and CEO. "Our success in achieving this goal is due to the tremendous dedication and teamwork of our entire staff".

About Cleaning Systems, Inc.

Founded in 1976, Cleaning Systems, Inc. is a manufacturer of premier cleaning and protection products for the transportation industry. CSI's Lustra™ Professional Car Care Products are environmentally friendly and designed to deliver a superior car wash experience, whereas, the DynaEdge™ product line provides the same quality of performance to commercial vehicles and industry applications.
