Con-Serv Manufacturing - US Patent Granted for Wastewater Reclaim System

Con-Serv Manufacturing (www.Con-Servwater.com), headquartered in Lakeland, Florida, is pleased to announce that on June 24, 2008 it has been granted a United States patent for a Waste Water Reclaim System (US Patent No.:7,390,419). A further continuation application and other patent applications directed towards other Con-Serv Manufacturing innovations are currently pending.

The patented waste water reclaim system utilizes multiple filters that may be alternately backflushed to enable continuous filtering of waste water. The nineteen patent claims also include methods for operating a waste water reclaim system.

Con-Serv Manufacturing has retained Babcock IP, PLLC (www.BabcockIP.com) to enforce their newly granted exclusionary rights and to further expand their intellectual property portfolio.
